

LOOKING DEEP INTO NATURE

EXPERTS IN ENVIRONMENTAL SERVICES IN BIODIVERSITY

Bioinsight is an
environmental company
that provides consultancy
services.

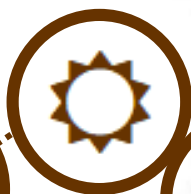

Our Mission We are
oriented and focused
on the success of the
projects in which we
are involved creating value
for our clients and for
the **environment**

We provide **environmental**
services for various economic sectors

Wind Energy

Solar
Energy

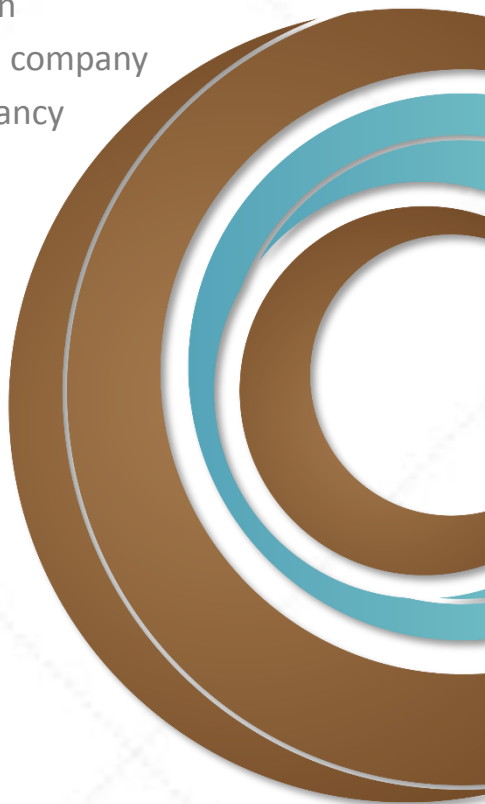

Hydric Energy

Transport

Electric

Our performance is based on principles of **sustainable management** and **social responsibility** and we consider communication and proximity as key factors to our success.

We aim for continuous improvement based on our **creative** and **innovative** genetics, keeping the focus on efficient and effective performance.

Our Vision To be a top consultancy company specialized in reconciling environment and economic activities.

Agro & Forestry

Over
10 YEARS

EXPERIENCE of personnel
in Renewables

OUR PRESENCE WORLDWIDE

Over 60 projects

Over 25 projects

1 project

Scientific & Advisory projects

almost
4500
MW

A circular graphic with a dark red border. Inside, the text "Over 2500 turbines" is written in a dark red, serif font. The background of the circle is white and filled with a grid of small, stylized wind turbine icons in various colors (red, green, blue, and purple).

Over
90 projects
WORLDWIDE

We study all kind of environment, both
onshore and **offshore**.

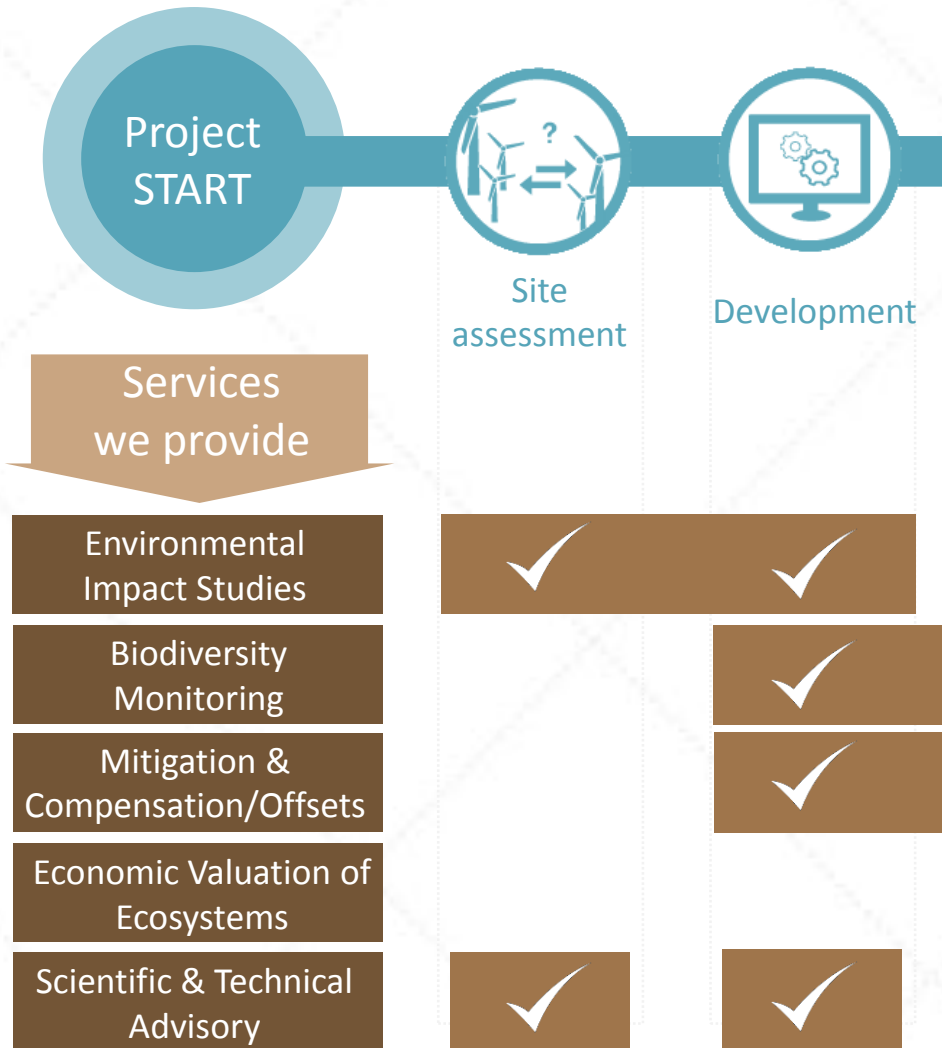

Marine
mammals
& seabirds

The illustration features two green offshore wind turbines on the right side. In the bottom left, a blue whale is partially visible, with blue concentric arcs representing sound waves emanating from it. In the bottom right, three blue fish are swimming. Two circular callouts with blue borders and dotted lines point to the whale and the fish. The background is a light blue gradient with faint, large-scale geometric patterns.

Fish &
benthic
communities

We care about **all the phases** of your project

Construction

Operation

Decommissioning

We use **state-of-the-art tools** to
better assess environment ...

Real-time tracking
devices

Drones or
UAVs

Automatic
bat detectors

Dog carcass
searches

Camera
trapping

RADAR
technology

and combine it with **innovative methods** to provide services specially tailored to your project's needs

Customized Curtailment

We can help you customize the mitigation measures for your project so that its viability is assured but not at the expenses of environment. Comparing to standard curtailment, our service may save your IRR up to 40%.

B.A.R.T. Biodiversity Assessment with Remote Techniques

Drone or UAV technology allows to collect information at a larger scale with higher accuracy, at rotor height and in inaccessible locations.

Real-time tracking of wildlife

This type of service allows a better understanding of wildlife movements within the project's area to better assess impacts. It also allow on-demand actions to avoid impacts. We use RADAR technology and location transmitters (PTTs & GPS/GSM).

Carcass search with dogs

Trained dogs increases the precision of detection of bat and bird fatalities at your wind farm, therefore being able to present impact evaluations closer to reality.
